Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1. Copies of foreign patent documents and other documents cited on p. 3 and 4 dated July 31, 03 are requested for examination.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 58-63, 67-72, 82-87, 91-93 are rejected under 35 U.S.C. 102(e) as being anticipated by Ackerman (Pat. No. 6,246,500).

Ackerman teaches a communication method sequentially including dividing each of a plurality of optical carrier signals 12, 14, 15 into a plurality of intermediate signals, each optical carrier signal carrying all of a plurality of wavelength division multiplexed initial data signals, each intermediate signal carrying all of the multiplexed initial data signals over a predetermined wavelength range, separating 72 each intermediate signal into the respective data signals contained therein, and combining 80 corresponding data signals separate from the intermediate signals into their respective initial data signals.

4. Claims 58-63, 67-72, 82-87, 91-93 are rejected under 35 U.S.C. 102(b) as being anticipated by Goutzoulis et al (Pat. No. 5,751,242) or Lembo (Pat. No. 5,583,516).

Goutzoulis et al teach a communication method sequentially including dividing 38 each of a plurality of optical carrier signals into a plurality of intermediate signals, each

optical carrier signal carrying all of a plurality of wavelength division multiplexed initial data signals, each intermediate signal carrying all of the multiplexed initial data signals over a predetermined wavelength range, separating 44a, 44b each intermediate signal into the respective data signals contained therein, and combining 50 corresponding data signals separate from the intermediate signals into their respective initial data signals.

Lembo teaches a communication method sequentially including dividing (OPTICAL POWER SPLITTER) each of a plurality of optical carrier signals into a plurality of intermediate signals, each optical carrier signal carrying all of a plurality of wavelength division multiplexed initial data signals, each intermediate signal carrying all of the multiplexed initial data signals over a predetermined wavelength range, separating 314 each intermediate signal into the respective data signals contained therein, and combining (OPTICAL RECOMBINATION) corresponding data signals separate from the intermediate signals into their respective initial data signals.

5. Claims 64-66, 88-90 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 73-81 are allowed.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dao L. Phan whose telephone number is (571)272-6976. The examiner can normally be reached on M-F 9:00-5:30.
